## Message from JS&MD (HFA) Shri Kuldip Narayan

The PMAY-U Mission is steadily moving towards the goal of Housing for All. With 123 Lakh sanctions and completion of nearly 64 Lakh houses, the scheme has emerged as one of the largest Affordable Housing schemes of the world. The promotion of innovative construction technology has been a constant endeavour of the scheme. Under the ambit of GHTC-India, the Light House Projects are getting readied at a fast pace. LHP Chennai has already been inaugurated by Hon'ble Prime Minister and is home to 1,152 happy families now. Next in the line-up inauguration is LHP Rajkot which comprises of 1,144 houses and has been constructed using 'Monolithic Concrete Construction using Tunnel Formwork'. The LHP Rajkot, once occupied, will be an iconic manifestation of innovative construction technology and a dignified living.

In order to widen the horizon and to bring technology transition in the construction sector for sustainable development, it is imperative to bring together all global and indigenous innovative technologies, materials and process shortlisted under GHTC-India as well as under IHTM and showcase them to the relevant stakeholders on a common platform. In view of the same, the **'Indian Urban Housing Conclave - 2022'** is proposed to be held in Rajkot, Gujarat from 19-21 October 2022. The Expo-cum-Conference will provide stakeholders a venue to demonstrate their technologies as well as deliberate upon various options of technologies, materials and processes for large scale adoption and mainstreaming in different type of housing construction suited to different Geo-climatic regions of the country. The inauguration of LHP Rajkot, an exhibition on Innovative Construction practices, Symposium on Affordable Housing and PMAY-U Awards 2021, all will be part of the three-day magnificent event. I look forward to an active participation by all stakeholders in the event.

## JS&MD, HFA, reviews the progress of Light House Projects

A meeting to review the progress of Light House Projects (LHPs) was held on 23<sup>rd</sup> September 2022 under the chairmanship of Shri Kuldip Narayan, Joint Secretary and Mission Director (JS&MD), Housing for All (HFA), Ministry of Housing and Urban Affairs (MoHUA). Representatives of six construction agencies of LHPs, officials of MoHUA and BMTPC, attended the meeting.

The meeting began with a welcome address by Shri RK Gautam, Director, HFA, MoHUA. Later, a presentation regarding the status

of ongoing construction activities at the LHP sites was made. Subsequently, state-wise presentations, progress of LHPs was reviewed in detail. JS&MD, HFA, directed the respective LHP construction agencies to expedite the construction activities. Discussions were held on handing over the homes to beneficiaries at Rajkot site since the work is almost complete there. Deliberations were made on allotment process at other LHP sites. Issues related to the ongoing construction activities was also discussed in detail during the meeting.

LHPs are being built at Rajkot, Indore, Lucknow, Ranchi and Agartala. LHP Chennai has already been completed. A minimum of 1,000 houses at each location are being constructed using six globally innovative technologies.

## Shri Amrit Abhijat, Principal Secretary, Government of Uttar Pradesh visits Light House Project, Lucknow

On 1<sup>st</sup> September 2022, Shri Amrit Abhijat, Principal Secretary, Urban Development Department, Government of Uttar Pradesh, visited Light House Project (LHP) in Lucknow, Uttar Pradesh to review the progress on site. He was briefed about the progress by construction agency officials and other State Government officers.

In Lucknow, 1,040 affordable houses are under construction. Already in use in Canada and Australia - 'Stay In Place PVC Formwork with Pre-Engineered Steel Structural System' technology has been adopted here for construction purposes. The plant manufactured

rigid poly-vinyl chloride (PVC) based polymer components serve as a permanent stay-in-place furnished formwork for concrete walls. The formwork system acts as pre-furnished walls requiring no plaster and can be constructed instantly. This System is suitable for residential and commercial buildings of any height from low to high rise. The advantages of this technology are many as having formwork already as part of system, the construction of building is faster as compared to conventional buildings. It also saves water and formwork system does not have plastering requirement and gives a very aesthetic look.

## JS&MD, HFA, MoHUA reviewed the progress of PMAY-U in States/UTs

Shri Kuldip Narayan, JS&MD, HFA, MoHUA, reviewed the status of implementation and progress of projects under PMAY-U with the States/UTs from 24<sup>th</sup> to 26<sup>th</sup> August 2022. In the meeting, JS&MD (HFA) observed that out of total 122.69 lakh sanctioned houses, around 19 lakh houses are yet to start which include nearly 12 lakh houses which were sanctioned prior to March 2021. He advised States/UTs to examine the status of non-started projects/ houses which were sanctioned prior to 31.03.2021. State/UTs should ensure grounding of non-started houses at the earliest or consider to get such projects/ houses surrendered/ curtailed. States/UTs should submit curtailment proposals at the earliest with the approval of SLSMC. States/UTs may get new houses sanctioned, if required, in the BLC vertical, against these curtailed houses.

## Shri RK Gautam, Director, HFA reviews progress of Light House Project Ranchi

Shri RK Gautam, Director, Housing For All, MoHUA visited Light House Project Ranchi on 2<sup>nd</sup> September 2022 and reviewed the progress of construction work with construction agency officials & Ranchi Municipal Corporation team.

At Ranchi, 1,008 houses are being constructed using 'Precast Concrete Construction System - 3D Volumetric' technology. It is the modern method of building by which solid precast concrete structural modules like room, toilet, kitchen, bathroom, stairs are cast monolithically in plant or casting yard in a controlled condition. These modules are then transported, erected, installed and integrated together in the form of complete building leading to significant reduction in construction & occupancy time. Monitoring of LHPs is being done constantly & periodic visits to sites help in expediting the progress.
